

QUEENSLAND

ASCI NETWORKING BREAKFAST SERIES 2019

5 JUNE

Supply Chain Design

“Network Design”, as it were, has evolved and is now considered “Supply Chain Design” as wider scoped considerations and decisions are made. Ever asked yourself, ‘what if?’ Well ASCI has arranged for Brisbane ASCI Members to harness some sophisticated technology for modelling, optimising and simulating a mock supply chain network.

Delegates will have the opportunity to choose alternative options and explore the service, performance, costs and risks associated with the change. All within a single integrated software platform from one of the world’s top software solution providers, Llamasoft, using its award winning Llamasoft Supply Chain Guru solution.

Keynote presenter: Shaun Gates, Managing Director, Lexian

Shaun holds degrees in science, chemical engineering and has a MBA. Shaun led a management buy-out of Lexian Solutions from Linfox in 2003 and has continued to lead the business for the last 16 years. Shaun has worked with many companies by assisting them to achieve their inventory objectives. Companies such as Hanes Brands (formerly Pacific Brands), Sleepmaker, O’Brien Glass and Norgren have all relied on Shaun’s extensive experience in managing inventory to assist them in achieving their outcomes.

Who should attend?

- ASCI Members and their guests
- Member of other related associations
- Supply Chain executives
- Planners and Demand Planners
- Procurement executives

Each event is "ASCI Endorsed" and is awarded half a CPD point, allocated when event attendance has been confirmed. Points can be retrieved from your ASCI Member Portal.
